

Our story is set in a snowy winter landscape in the woods which are home to bears and foxes and wolves.

- Can you think of other animals that live in snowy landscapes around the world?
- Can you match names of the continents with where they are on the map below?
- Can you colour the map in according to where in the world is cold or hot and where there are deserts, jungles, forests or mountains?

On the next page there are pictures of animals. Can you name them and can you find out where world they live and mark it on the map?

Can you build a snowy environment in a shoe box and add pictures of the sorts of animals and landscape you might find there?

Africa, Antarctica, Asia, Australasia/Oceania, Europe, North America, South America

We'd love to see what you have done, so please send us your pictures to hello@tutti-frutti.org.uk
